

COURT AUTOMATION COORDINATING COMMITTEE
Approved Enhancements to AZTEC for release 1.5
At meeting of 1/23/02

The following table lists the CACC approved enhancements/modifications to the 1.5 release of the AZTEC case management system. Note: mod numbers are for reference only, and are not intended as priorities.

1.5 mod #	Modification	Requirement	Estimated Development Hours	Funding Source A= ACAP L= LVC B=Both	Comments
1	Notification Letters (missed court date)	A letter generates upon court date being missed by defendant (by court specified number of days as set by a system parameter).	500	B	
2	Notification Letters (after default disposition entered)	A letter generates upon default disposition being entered. License suspension to follow.	400	B	
3	Notification Letters (sent to collections)	A letter generates notifying defendant that debt is going or has gone to collections.	500	B	
4	Database Improvements	Example is turn logging on, which will improve data recovery after system failure. This will also improve database efficiency.	1000* each build (* estimate is for hours set aside for improvements as each build rolls out)		
5	DPS electronic reporting	Phase II of pilot project is on-line receive and re-transmit to DPS. DPS response to go to queue where the user will be able to work queue on-line, and send re-transmits electronically. AZTEC changes required to facilitate this, and to accommodate new FDR. This will allow pilot project expansion to more courts.	600	B	
6	Protection Order Enhancements (docket update)	All events entered on Protection Orders should be reflected in the AZTEC Case Docket and ROA.	120 (Entry of order only).	B	
7	Auto Default & Sentencing	Automatically enter sentence information upon default, and automated back-out if and when default is set aside.	4800	A	
8	Pull Down Menus/ windows with editing	Clerks' Top 5. Events and Case Types with descriptions and pull down menus instead of codes. Also, user should only see events, case types, and forms	640 to determine scope	B
